SURFACE MINING TECHNOLOGY

Increase safety, productivity and maintenance savings.

DIPPEREDGE™ GIVES YOU:

- No heavy mechanical adapters
- 70% fewer parts
- 15% lighter lip*
- Faster cycle times

CRmining.com

TRANSFORM THE STANDARD.

With the removal of adapters and the slimline profile of the DipperEdge[™] Cast Lip System, mine sites could decrease their cost per tonne. Lighter dippers allow shovels to move more material, while the reduction in G.E.T. requirements significantly reduces the cost. **INCREASED CAPACITY** LESS G.E.T. MEANS LESS COST DECREASED SWING TIME STRONGER LIP HAMMERLESS LOCKING G.E.T. ADDED SAFETY AND MAINTENANCE BENEFITS DIG FLOOR PLANE REDUCED DIG ENERGY DESIGNED TO FIT EXISTING DIPPER No mechanical REDUCED adapters = less DIG ENERGY steel^ above dig floor plane **DIPPEREDGE (WIDE RADIUS) DIPPEREDGE (SQUARE EDGE)** KOMATSU 4100XPC CAT7495 AND P&H 4100A/XPB **OPTIMA DIPPER** CONVENTIONAL DIPPER

*Reduction of LIP and G.E.T. mass savings when compared to competitor equivalent through scale testing, engineering analysis. Ared area indicates competitor equivalent CONNECT WITH US (in) (f) (D)
