

GRIPASSIST

Eliminate human contact with GET
during installation and removal

REMOVES
ALL GET
TYPES

HANDLES ANY GET

No matter what GET you've got on site, the GRIPAssist can handle it. It can lift and move all types of GET under 500kg regardless of manufacturer or machine, including hydraulic excavators, wheel loaders, rope shovels, and draglines.

REVOLUTIONIZING MINING SAFETY

Universal GET Handling

The GRIPAssist is a hydraulic arm that grips GET. It attaches to a skid steer, controlled through the skid steer operator.

- The hydraulic arms can remove any category of GET
- Maintenance is a breeze with bolt-on, bolt-off grip pads
- 180-degree swivel motion lets you maneuver GET anywhere it needs to go
- Fits onto any track-based skid steer with a lifting capacity of over 950kg, so no need to buy additional machinery

Handles all GET types and more with maximum pressure

Up to 500KG pick up capacity

Grab pads

Safer GET Handling

By removing direct human interaction, GRIPAssist significantly reduces injury risk. No more dangerous suspended load, hammers, pry bars, or other hand tools.

Up to 32% of injuries in surface mining occur due to strenuous movements.* Reduce the risk with the GRIPAssist by removing and repositioning GET without high risk human contact.

*Safety Performance in the WA mineral industry 2018-19

Cut Maintenance Times

By removing hand tools, GET changeouts get seriously speedy. The powerful hydraulic arms and tough rubber grip pads remove stubborn GET with ease.

CR Mining is on a mission to revolutionize mining productivity.

We engineer the most advanced surface and underground mining solutions for the world's best miners to unlock productivity, enhance safety, and reduce maintenance requirements.
