

LHD LIP SYSTEMS

Reduce total cost of ownership. Increase productivity.

WEARPACT™

SNRG™

ARMOURBLADE™

CR Mining's world-class GET technology enables our partners to reduce the total cost of ownership and improve productivity across their entire underground fleet.

- Reduce total cost of ownership
- Increase reliability and machine availability
- Longer wear life
- Improve productivity

Armourblade is a weld-on, low profile, high penetration bucket edge system developed for customers who want high quality, reliable weld-on GET. The edge systems are available in full spade and semi spade configuration.

FEATURES

Maximize service life

Proven increased production for a quick return on investment.

Longer wear life

Reduced maintenance costs.

Customized to your requirements

Variety of sizes and shapes available to fit any lip configuration.

Lip attachments

ARMOURBLADE			
Product Code	Part Description	Weight (KG)	Weight (LBS)

The Most Advanced Productivity Solutions

CR designs simplify the maintenance process, reduce the demand on maintenance teams, and improve digging efficiency with the correct GET application.

Whether you are targeting increased reliability, longer wear life, or improved productivity, with our expert advice and service options, you can be sure CR GET is the right choice.

Designed to Reduce Total Cost of Ownership

The CR underground GET range is designed specifically to deliver reliability and reduce the total cost of ownership of underground mining equipment. Our dedicated team of product experts is committed to delivering a product that meets your mining requirements.

CR Mining is on a mission to revolutionize mining productivity.

We engineer the most advanced surface and underground mining solutions for the world's best miners to unlock productivity, enhance safety, and reduce maintenance requirements.
