

THUNDERBIRD 1110

DRILL OPTIMIZATION

Reliable, accurate rock knowledge and improved driller user experience combined with state-of-the-art data analysis to manage drill and blast operations.

Thunderbird 1110 is a high-precision GPS and rock strata measurement system for rotary blast drills. Paired with our Orion Data Analytics, Thunderbird 1110 provides drill & blast managers unsurpassed insights on drilling performance through unique cloud-based data analytics.

Thunderbird 1110 is available with StrataSense, the measure-while-drilling (MWD) capability that provides rock hardness information delivered in real-time to ensure more informed and efficient blasting.

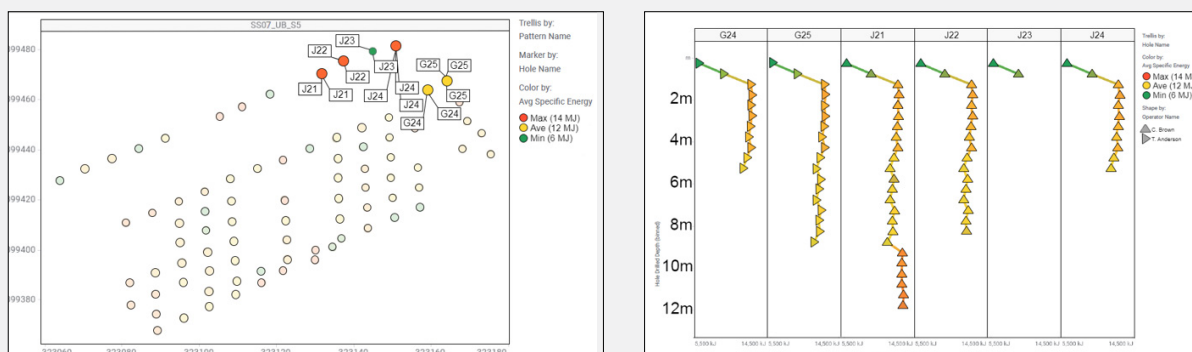

STRATASENSE

Precision Data Collection and Real-Time Reporting

- ✓ High resolution rock hardness down to 10cm intervals
- ✓ Precision Data Collection and Real-Time Rock Knowledge
- ✓ Enables optimized hole loading and better fragmentation

STRATASENSE - Drillhole data analysis, and rock hardness visualization

CR Powered by Epiroc is transforming mines with cutting-edge technology.
We develop industry-leading digital technology solutions for the mining industry, working together with the world's best miners towards a safer, more productive, and sustainable future.
